

In part 1;

- Code two search method and test both of them in add method but use one of them at a time.
- Both method should traverse according to general tree, not to binary tree(Examine the binary tree and traversal results shown below).

Levelorder Search should traverse: 1, 2, 4, 7, 3, 6, 5

Postorder Search should traverse: 5, 3, 6, 2, 4, 7, 1
